

About NMDC Infra

NMDC Infra is the civil construction powerhouse of NMDC Group, delivering transformative infrastructure that drives mobility, powers economies, and accelerates national progress.

The company is the trusted expert behind the tunnels, utilities, and energy networks that connect communities and enable commerce across the region. Its work forms the foundation of development – linking people to opportunities and nations to the global economy.

With advanced techniques, integrated capabilities, and a strong commitment to operational excellence, NMDC Infra delivers complex, high-value, and nationally significant projects with precision. From industrial facilities and critical utilities to commercial and destination-driven developments, its portfolio fuels economic growth and diversification.

NMDC Infra specializes in marine precast capabilities including breakwaters, quay walls, armor units. Expertise in precast concrete, marine products, and industrial civil EPC. This ensures the delivery of sustainable, cost-effective construction solutions, supported by a proven track record of high quality, end-to-end construction projects across the UAE and Saudi Arabia.

What sets NMDC Infra apart is its agility and vertical integration. The company operates two state-of-the-art production plants specializing in Hollow Core and Precast components, alongside an In-house 3D concrete printing facility. These combined capabilities enable NMDC Infra to design, manufacture, transport, and install core structural elements, ensuring unmatched control over quality, cost, and timelines. NMDC Infra does not just build infrastructure – it makes it, and it makes it happen.

NMDC Infra is a majority-owned subsidiary of NMDC Group.

NMDC Group Mission, Vision, and Values

Our **vision** is to deliver innovative solutions shaping the future.

At NMDC Group, our **mission** is threefold:

- We leverage the talent and experience of our people and provide opportunities to build successful and rewarding careers.
- We serve our clients through delivering EPC solutions and beyond, that are environmentally conscious, safe and cost efficient.
- We generate exceptional returns for our shareholders.

Our organizational **values** unite and inspire us:
Knowledge – Accountability – Morality – Alliance – Leadership

Responsible business

At NMDC Infra, sustainable development is rooted in innovative construction solutions. The company champions the use of environmentally responsible building materials, such as precast concrete, which helps shape a greener, more efficient built environment. Precast technology not only reduces environmental impact compared to traditional materials but also improves construction efficiency and design flexibility, resulting in smarter, more sustainable urban growth.

NMDC Infra is fully vertically integrated: designing, manufacturing, producing, transporting, and installing precast and structural elements across its projects. What this means is that the company controls the full value chain, reducing dependency on multiple contractors, shortens project timelines, and enhances cost efficiency and sustainability through advanced value engineering practices.

Guided by a strong sustainability framework, NMDC Infra actively work to optimize energy and resource use across its operations while contributing to initiatives that protect and enhance the environment. As a trusted partner in infrastructure development, the company is committed to enabling progress that balances economic growth with environmental care and social responsibility.
